

Chute Weigh

The Chute Weigh system is ideally suited for installation under a manual or hydraulic livestock squeeze chute (crush). Two different Chute Weigh system capacities are available: 5000 lb or 10,000 lb (1498 kg, 2268 kg or 4536 kg). The ease of installation and setup allow the system to be accurately weighing in just minutes. Other common applications include weighing pallets, installations under tanks and hoppers. Also suitable for long lengths of pipe or other difficult to handle materials. Installation can be portable or permanent depending on specific application.

Chute Weigh — Single Pad Assembly Only
